

28 August 2014 – From Jamaica to Cape Verde, from Bob Marley’s ubiquitous Rastafarian tunes to Ibrahim Ferrer’s sometimes soulful, sometimes upbeat style, Small Island Developing States have given us an incredible range of accomplished musical artists and diverse styles.

2014 is the [International Year of Small Island Developing States](#) , an event to celebrate the cultures, heritage and remarkable diversity that imbibe these states. In honour of this richness, iTunes and the UN have partnered together to bring the sounds of these islands to you through the initiative Island Voices.

Featuring the works of over fifty artists born and raised on the world’s smallest islands, Island Voices aims to promote the diversity of music from the islands and its contribution to international music, and will feature the best works from the Caribbean, Pacific and Indian Ocean islands.
