Novel Coronavirus (COVID-19)

What is COVID-19? COVID-19 is the disease caused by a new coronavirus called SARS-CoV-2. WHO first learned of this new virus on 31 December 2019, following a report of a cluster of cases of ‘viral pneumonia’ in Wuhan, People’s Republic of China.

    - In this blog series, authors explore the uneven distribution of impacts of both the pandemic and the crisis response, as well as the social, political and economic drivers of these disparities. The series engages UNRISD’s networks and draws on its vast body of social development research to provide evidence-based responses to the current crisis as it develops and suggest viable strategies for a future where similar crises are not only less devastating, but also less likely to happen.
